It would appear, from what they are sayin', that each of 'em ort to be confined and kept out of sight as a menace to society and also as public nuisances. There has been considerable speculation that so many people may be turned off by th' lackluster offerin' in th' race, they would not bother to vote, but this appears to be somethin' less than likely to happen. Since th' polls opened for absentee votin' there has been a literal

### Producers, Royalty Owners Attack Oil Tax Constitutionality

Austin - Texas independent oil producers and royalty owners are actively involved in the major lawsuit filed in Cheyenne, Wyoming, last week attacking the constitutionality of the Crude Oil Windfall Profits Tax. Dallas L. Frank Pitts, President of the Austin-based Texas Producers and Royalty Owners Association described the tax as "a capricious and arbitrary excise measure" that hits hardest the nation's 12,000 independent producers and some two million royalty owners. Pitts said: "The so-called windfall profits tax is totally unrelated to profits and amounts to the biggest excise tax in history. More than \$27 billion will be siphoned from the producing industry during the next decade, assuring that literally hundreds of thousands of badly needed domestic wells will not be drilled. Furthermore, it endangers the economic livelihood of the more than 1.5 million royalty owners who average less than \$800 monthly in royalty income and find themselves losing more than one-third of it under this unfair tax. Most of these owners rely on Social Security and modest royalty income to pay their bills. Some 700,000 Texans are paying approximately one-third of the gigantic

The Commission solicits the input of intrastate shippers, receivers, and railroads on whether state certification under the Interstate Commerce Act, Sec. 11501, Title 49, Subtitle IV, U.S. Code is in the interest of the Texas public. Particular areas of interest which could be addressed are: as follows:

## Chaparrosa Santa Gertrudis, Quarter Horse Sale Nov. 10

La Pryor, Texas — The 6th Annual Cowman's Choice Sale will be held at Chaparrosa Ranch Nov. 10 with more than 300 head of cattle and horses making up the offering. The sale includes 100 purebred certified breeding age Santa Gertrudis bulls, the largest number to be offered at public auction by any individual breeder.

Chaparrosa Ranch is owned by Mr. and Mrs. Belton K. Johnson of San Antonio, Texas, pioneer breeders of Santa Gertrudis cattle who have extensive ranching interests in Texas and California.

In addition to the bulls, 100 purebred Santa Gertrudis females, 100 crossbred heifers and six registered Quarter Horses will be sold. A special feature of the sale will be "free delivery" of the animals purchased. Johnson said Chaparrosa Ranch will deliver the animals to the ranch of the buyer, or to a central convenient location. In the case of foreign buyers, animals will be delivered to the nearest export point. An added feature this year will be an offering of 25 purebred show quality weaned heifer calves expected to attract the interest of youth for 4H and FFA projects. This is in addition to 74 classified Santa Gertrudis heifers safe in calf to Santa Gertrudis bulls.

The crossbred offering will consist of heifers safe in calf to Santa Gertrudis bulls as well as a selection of open heifers.

The Quarter Horse offering will include two fillies, three geldings and one stallion, all sired by the stallion Texas Pan, Jr.

The activities begin Sunday, Nov. 9, when the animals are available for inspection at the ranch. That evening the Ranch will host a cocktail buffet at the Uvalde Country Club. On sale day, Chaparrosa cowboys demonstrate the "formando" with the ranch remuda. Lunch is served at 11:30 and the sale begins at 12:30.

For a sale catalog and additional information, write to Chaparrosa Ranch, Box 489, La Pryor, Texas 78872 or call (512) 365-4422.

## Are you WASTING 25% of your feed money?

Can you see undigested feed in your cows' droppings?

Here's how to save wasting as much as a pickup load of feed for every 50 cows every winter month.

Rumenade boosts the rumen! This means your cows will get more nutrition out of the tough, fibrous roughage they eat. Digest more and waste less. Ordinary supplements and cakes just don't do this. Cattlemen feeding for maximum reproductive performance have proved to themselves Rumenade costs less per cow to feed.

You can see the difference when you feed.

stamped to vote. Records are held in this volin' just about everywhere. Some comment has been heard and considerable wonderment has been expressed over this phenomenon, but we figure it was explained nicely by the fellow who said it didn't surprise him none because "I never saw so many people to vote against, it's the chance of a lifetime to hit a few licks and feel good about it!"

One of th' things that is makin' this election especially interestin is th' fact there are a lot of hotly contested legislative and congressional races. A number of th' good folks who have voted in our "Sound Off" balloting have brought this matter up, that changin'

th' guard at th' White House ain't gonna cut much ice, unless we also see some of the rats outta th' basement in Congress and th' Legislatures. No President and no Burrocrat and no Tax Collector ever bedevilled us with excessive taxes and waste of oil, misdirection of our tax dollars, unless th' gate had been opened first by either Congress or th' Legislature. Some changes in these offices are th' first step to curbing our present illsnesses. Meanwhile, you & me might just as well go down and vote and then sit back and relax and enjoy whatever happens. We are bound to nail at least some of these rotten apples. If we bother to vote again 'em!

Ever thine,  
The Editor.

P.S. Uncle Dunk notes where th' Govinint has handed th' League of Wimmun Voters a cool quarter of a million dollars to help th' Bureau of Land Management mismanage our federal public lands. Dunk figures th' only good news folks in th' West have had outta this mess is that Secy. of Interior Andrus has announced he is leavin'. Dunk says you got to hand it to our Burrocratic Scientists. Recently they went to Florida and captured some feral hawks, which they refer to as wild, but could have just been some stray! farmers down there had mised. Anyway, they proudly announced they had inoculated these hawks with with Affrican Swine Fever virus and sure enough, they caught it! With this kind of genius at work th' Millennium can't be far over th' horizon — Thassal, Brothers!

**Florida Auctions**

Winter Park, Oct 17 (F-S) — Florida cattle auctions (weekly review) receipts at 24 markets this week 22,000. Slaughter steers and heifers scarce, cows generally steady to 100 lower after trending higher Monday. Bulls steady to firm, calves and vealers steady to 200 lower. Heavy offering of feeder cattle with more heavy calves marketed. Late week sales appear to cancel early gains and last demand remains for calves weighing over 400 lb. For the week feeder steers and heifers under 400 lbs steady to 100 lower, or 400 lbs steady to 100 higher. Replacement cows steady to firm. Cattle receipts highest total past 18 months.

reduce costly oil imports from the security-sensitive Mid-East and other foreign sources. In fact, the tax does the opposite, and this will be the main argument pressed in the court case.

"As the case proceeds to the U.S. Supreme Court in the future, additional arguments will be pressed. The Constitution requires that an excise tax be levied uniformly. The windfall tax fails to do this, since it exempts production north of the arctic circle in Alaska. The tax also is levied on a minority to finance as yet unknown objectives for the common good without providing appropriate compensation under due process requirements of the fifth amendment."

**Where Your Money  
Thrown by USDA**

Recently, the USDA announced that one of its chief policy-makers, Howard Hjort, was recipient of a special Presidential citation (and \$20,000 cash bonus) for, among other things, shifting USDA programs from producer-oriented to consumer-oriented. Now comes word that the Bureau of Land Management has awarded the League of Women Voters a \$250,000 cash grant to be used over the next two years to "promote more public participation in BLM planning and decisions in Arizona, Montana, Wyoming, Idaho, and Nevada." By Goggins, writing in the Western Livestock Reporter, comments "With this kind of nonsense going on, and government paying the League of Women Voters to work against the common and sheepman on BLM ground, would make it almost impossible to operate many of the ranches in the states mentioned."

In a weekly column, the newspaper farm editor said 49 "distinguished executives" received \$20,000 each, and 208 "meritorious executives" received \$10,000 each. Hjort's award was given for his efforts in successfully making "the shift in USDA policy from producer-oriented to consumer-oriented in policy and budgetary matters."

## In Australia Farmers To Reap Record Earnings

Record earnings in wheat and wool exports in 1979-80 helped fuel a total rural economy boom as Australian farm earnings reached \$A11.8 billion.

The gross value of rural production increased by nine percent on the previous year, and was about \$A100 million more than estimates made by the Bureau of Agricultural Economics in May.

In total gross value, crops rose by 4.4 percent to \$A6.15 billion, livestock and slaughtering by 14.3 percent to \$A2.51 billion, and forestry, fishing and hunting by 8.7 percent to \$A16.7 million.

As an increase in Middle Eastern trade lifted to \$A614 million the gross value of sheep and lambs slaughtered and exported live, a 48 percent increase.

A rise in world sugar prices also benefited Australia, lifting the value of the crop by 38.4 percent to \$A649 million.

But it was wheat and wool that dominated the earnings. Australia exported 15.2 million tons of wheat worth \$A2.2 billion during the year 1979-80, not only a record for an Australian export commodity, but also an accomplishment which made Australia

"World statistics indicate that in spite of a likely good crop next season global stocks will still fall. The indications favor a bullish trend," said Sir Leslie Price, chairman of the Australian Wheat Board.

As far as wool is concerned, income amounted to \$A1.67 billion. Wool sales rose 20 percent, almost \$A280 million more than last year's record wool receipts.

The quantity of wool sold was actually almost the same as last year, but buyers — led by Japan — bid up the average price per bale from \$A325.03 to \$A389.87.

## Killing Insects For Feed Studied By UW Researchers

It may be a while before farmers start trying to raise insects, but now the idea is no longer as far-fetched as it once might have seemed.

Pressure is increasing to use corn, soybeans and other grains for human consumption rather than for livestock feed. That's why University of Wisconsin-Madison researchers are seeking ways to use insects as livestock feed.

Research to date indicates that, under controlled conditions, some insects have the ability to transform wasteland vegetation and types of forages not well utilized by livestock into high-protein livestock feed.

The appetites of some plant-feeding insects could be a real "plus" for livestock feeders, according to UW-Madison entomologist and project director G. R. DeFoliart.

Cattle, for example, may have to consume 15 pounds of forage to increase body weight by a pound. Larval stages of some insects can gain a pound of weight with as little as two pounds of forage — a conversion efficiency of 50 percent. Several other insects have a conversion efficiency of 20 percent.

And as a general rule, dried insects contain approximately 60 percent crude protein.

Researchers selected four insects that had high conversion efficiencies and that also fed on plants which are not now well utilized by livestock. They also selected insects that would be relatively easy to rear and handle.

Insects now being studied are southern armyworms, Mormon crickets, tomato hornworms, and protein moths.

Most research to date has dealt with Mormon crickets, 1 1/2 inch long dark brown insects which have plagued western farmers and ranchers for decades. They look like fat grasshoppers.

Chickens fed ground, dried crickets as product resembling coffee grounds) fared well, although the economic feasibility of the ration isn't yet known.

"The average broiler chicken eats about eight pounds of feed in its lifetime. Thirty percent or 2.4 pounds of this amount could be ground crickets," Sunde says. "A laying hen eats about 80 pounds of feed. Twenty percent or 16 pounds could be crickets."

Using Mormon crickets for a protein source isn't a new idea. Native Americans harvested them for winter food, made soups, roasted and pounded them into a coarse meal, and ground them with grass seed to make a paste they baked and ate. Those who were too hungry to wait for the drying, grinding and baking process simply pulled off the crickets' heads and legs and ate them "raw."

Some insects have been man's traditional enemies, destroying his crops in fields and in storage. But principles learned in today's research could change these age-old foes into a palatable — at least to livestock — food source.

## Farm Cooperatives Have Separate USDA Agency

Bergland said the new agency will begin operating as a separate unit Oct. 1.

vited to participate. Points are accumulated by showing and placing in any open Simmental Show in the United States prior to the Houston Show. The 50 head will compete for \$20,000 in premium money.

Consigning the Show cattle to the Champion of Champions Sale will be optional and all cattle that are consigned must sell. Skipper Hill, Executive Secretary for the sponsoring Texas Simmental Association, stated that there would be an additional 25 head of consignments, besides those from the show, accepted. The cattle consigned will be comparable to those in last year's sale that averaged over \$8,600, highest of all breed sales during the Houston Stock Show. "Jo Jo," a proven five-year-old hard sire from Gamble Creek topped the sale going for \$42,000 to John Welder & Co., Victoria, Texas.

The two top selling female lots were three-in-one packages which sold for \$30,000 each, both to Charlie Dunkin of Birmingham, Ala., and from Gamble Creek. ### Triple J Ranch Joins "Robert E. Lee" Syndicate

Triple J Ranch has become the final member of the "Robert E. Lee" syndicate, owners of the young Beefmaster bull by the same name. Triple J Ranch, located in Houston, Texas, is owned by Mr. and Mrs. Joel Wahlberg and Mike Kohman. The syndicated value of "Robert E. Lee" is \$450,000, making him the most valuable Beefmaster bull in the breed.

rell Cattle Company, and Dunkin Farms in the ownership of the record-setting bull. The Confederacy, which was organized in 1979 to purchase "Robert E. Lee" includes Circle R Farm, Marietta, Georgia; Zipperer Beefmasters, Ft. Myers, Florida; and Gamble Creek Beefmasters, Parrish, Florida. The \$165,000 purchase price of "Robert E. Lee" established and remains the highest price paid for a Beefmaster sold in public auction.

"Robert E. Lee" has rapidly become one of the most popular bulls in the Beefmaster industry. Sired by "Crimson Warrior", he was a top performing calf and yearling. His first calf crop has been exceptional; his first son, "Warrior III", a near carbon copy of his sire, has been highly praised by Beefmaster breeders. Female bred to "Robert E. Lee" were in strong demand at the recent "Confederacy" sale.

With the interest acquired by Triple J, the syndicate is closed. For more information on "Robert E. Lee" and his progeny, contact The Confederacy at 4675 Roswell Rd. N.E., Marietta, Georgia, 30062 or any syndicate member.

# Fed Cattle Opened Sharply Lower at Central Markets, Hog Prices Mixed

Around the major central markets on Monday the prices on fed steers and heifers sagged, reflecting bearish news on the dressed beef markets Monday. Slaughter cow prices were highly mixed ranging higher to lower, rather sharply. Bulls were little changed. Butcher hogs were highly mixed with higher and lower prices mixed from point to point, despite lower quotations Monday on most pork cuts. There was little in the receipts or prospective slaughter figures to tilt prices on either species. Slaughter cattle on offer were about 2,500 larger than a week ago. Estimated cattle kill Monday was 121,000, 2,000 above a week ago and 11,000 above a year ago. Estimated hog kill Monday at 352,000 was 16,000 under last week and 6,000 above a year earlier. Price trends, quotations on choice and prime steers and heifers and on the mixed good and choice grades, and on good and choice Holstein steers, and U.S. 1-3 hogs scaling 200-280 pounds included:

OMAHA fed steers 50-75c, spots 1.00 lower. Heifers 50c to 1.00 off. Steers 65.50 to 68.00 and 65.25-66.50. Heifers 64.00-66.50 and 63.00-64.50. Hogs 25-75c higher at 47.00-48.25. Hogs 75c to 1.00 higher at 46.75-48.50.

JOLIET fed steers 1.00-1.25 lower, heifers 1.00-2.00 lower. Steers 67.50-69.75 and 66.50-67.60. Holsteins 62.00-63.00. Heifers 65.50-67.25 and 64.00-65.60. Hogs steady to 50c lower at 46.50-48.25. ## Pinzgauers Have Busy Show, Sale Season Scheduled in 1981

Pinzgauer people have a busy show and sale season planned for early 1981.

The American Pinzgauer Association's national show and sale will be held Jan. 23, 1981, at the National Western Livestock Show in Denver.

A Southwest Pinzgauer show and sale will be held at the Mid-Winter Livestock Expo in Shreveport, La., on Feb. 7.

## National Pinzgauer Sale Dates Set

Wharton, Texas — The Southwest Pinzgauer Association has made final arrangements with John Joyce, World Sales, to manage three upcoming National Pinzgauer Sales. The first sale is the National Sale to be held in Denver, Colorado on January 23, 1981 during the National Western Show. The second sale will be the National Pinzgauer sale held in Shreveport, La. on Feb. 8, 1981 during the Louisiana State Fair and the third sale is the National Pinzgauer Sale held in Houston, Texas on February 27, 1981 during the Houston Livestock Show and Rodeo.

Nomination forms for these three sales will be mailed to prospective consignors by October 15, 1980. Consignments will be selected by a screening committee and only animals of the highest quality will be accepted.

For further information regarding these three sales you can contact: Gary Arnold (Rt. 1, Box 120, Jefferson, Texas), W. J. Sparks, III (Box 2053, Victoria, Texas) or John Joyce, World Sales (Rt. 2 Box 232, Wharton, Texas 77488) or you can call AC 713/667-2212.

"This test should provide some interesting information on Pinzgauers and how they compare with other steers in the areas of rate of gain, feed conversion and cost of gain, grade and yield, and the bottom line — their profitability," Kollett said.

### Proposition 1 On "Unmanned Tellers" On Nov. 4 Ballot

A constitutional amendment to provide Texans with around-the-clock banking services at convenient locations has gained the backing of a 1,800 member statewide organization. Don Cavness, Austin businessman and coordinator of the public education campaign for Proposition 1 on the November 4 ballot, announced that the November group has been formed to assist the three statewide banking associations in support of the amendment.

Cavness said: "Proposition 1 has only one purpose, and that is to provide unmanned teller machines at locations more convenient to bank customers so that they can withdraw or deposit money whenever they wish without going to their bank. It is the most important time-saving and energy-saving development in Texas banking in recent history."

The Texas Bankers Association, Independent Bankers Association of Texas, and Texas Association of Bank

He pointed out that bank customers will have full control of their own accounts and strong consumer protection under federal law if they use the unmanned tellers. Proposition 1 also provides that off-premises unmanned tellers must be shared by banks within a county on a non-discriminatory basis. The tellers may also be shared with credit unions and savings and loans. "The Constitution at present does not permit banks to install unmanned tellers except at banking locations," Cavness explained. "Credit unions and savings and loans institutions do have this privilege, and Proposition 1 merely extends the same opportunity to state and national banks in Texas for competitive equity in providing customers with another convenient choice."

A state law has already been passed, subject to approval of the constitutional amendment, which limits unmanned tellers to five functions: cash withdrawal, deposits, loan payments by the customer to the bank, transfer between a customer's accounts within the same bank, and balance information for the customer.

"The law makes certain that the customer will have complete control of his or her banking activities in using an unmanned teller," Cavness said. "Funds could not be transferred from one person's account to another and there are strong consumer protections and security features built into the process."

## Vote for Greater Banking Convenience

Passage of Proposition 1 on the November 4th ballot will open the door to even greater banking convenience. This simple change in the law will allow Texas banks to place unmanned teller machines at convenient locations for faster service, night or day. These teller machines are becoming a convenient option for handling routine banking business.

"Round-the-clock banking at unmanned tellers is convenient, safe and a positive step toward avoiding unnecessary credit card use... moreover, it is an energy saver — instead of traveling across town to a bank, an unmanned teller can be built in your neighborhood."

— San Angelo Standard-Times

Proposition 1 "will make life easier for bank customers... (it) will eliminate many, if not all, of the tortuous lines seen clogging drive-in bank lanes."

— Houston Chronicle

Proposition 1 "has gained widespread support as the amendment faces voters Nov. 4."

— Orange Leader

"Off-premises unmanned teller machines should be approved by Texas voters."

— San Antonio Light

**AVOID CHANGING WELL LEATHERS FOR MANY YEARS**  
Perma-cups are molded urethane, more wear resistant than nylon. Perma-cups will outlast leathers 10 to 1. Their tapered design allows only 1/8" wearing. Instead of 5/8" of a leather. Much less friction for easier pumping extends cylinder life greatly. Perma-cups must be used in a good or new cylinder, as they do not swell. Install Urethane Perma-cups. Urethane Check-balls, and Urethane Pump Rod-guides, and don't pull that well for many years. Thousands are in wells that have not been relined (in 9 years) All are available in standard cylinder and pipe sizes. Write or call for our catalog. We ship same day order is received. This is our 30th year serving ranchers.

**Black Maine-Anjou Steer Premiums Set.**  
The American Black Maine-Anjou Association announces premiums of \$2,500 and \$1,000 for the Grand Champion and Reserve Grand Champion steers, respectively, at the American Royal Stock Show in November. The steers must be at least 87% Maine-Anjou, predominately black as evidenced by Angus base, and enrolled with AB-MAA. Membership and enrollment applications are available through the Association office.  
The Board of Directors voted to establish an appendix register for red heifers which are the offspring of Brangus or Angus cows. Their offspring will be eligible for registration with the AHMAA.  
The Board also voted to sponsor a junior heifer show and put up a \$10,000 purse. Further details will be announced at a later date.

Thomas D. Price, has been promoted to the position of Beef Product Manager for American Breeders Service, according to a recent announcement by Russell J. Berns, the firm's Director of Marketing. In his new position, Price will work closely with the Beef Cattle Breeding Department at ADS on product line recommendations. He will also provide input on advertising and promotional activities. In addition to these new responsibilities, he will continue to play a major role in training technicians and herd owners in beef herd management with particular emphasis on estrus synchronization and A.I. programs.
